

4. Map

5.

- a. Scenarios: Bob is a content creator who is looking to gain more subscribers on youtube. He wants to see what kind of videos get the most views, but all the videos on the youtube trending page are mostly from company accounts. Bob wants to make sure his audience likes the type of content he makes but he also wants to gain views.

Susan is a part of a company where she helps decide where to run their ads on. She is looking for videos that are family friendly because her company makes children's toys and she wants to make sure they are targeting the right audience.

- b. User Stories: As a content creator, I want to look at trending statistics to help determine what I should post next. As a company running ads on youtube videos, I want to see which type of videos would get my ad the most views. As a youtube viewer, I want to see which videos trend in the categories I watch so that I can figure out what videos to watch next.

6. Feature List

- a. Putting all trending videos in categories
- b. Giving the possibility to view trending videos by region
- c. Updated list with the categories that trend the most on youtube
- d. Allowing logged in users to save any videos that they find
- e. Allowing users to input a video link and it would tell them how trended that video is
