

1. Description of how the project meets required specifications (4 pts)
 - ☐ For the web layout and content I have a clear title and I have a NavBar that is clear to read
 - ☐ All pages look similar with the same header and footer on each page.
 - ☐ For this website I wanted to have people who likes shoes to come and look to see if they like any shoes on the page and have the ability to purchase a shoe.

2. Summation of critiques received and how application updated in response (4 pts)
 - ☐ On my website I had users have problems with the gallery quiz not telling them if it was right or wrong, so I implamented a javascript that tells the user if their aswer is right or wrong.
 - ☐ When a user trys to sign-in their told if the username and password is correct.

3. Description of how well the application meets stakeholder/client's needs and the plan with the website going forward
 - ☐ For my website it is for people who likes shoes and are looking to purchase or just browse. It meet stands for clients by giving them the ability to puchase a shoe that they see on the website. I have a fun interacing quiz that clients can test their knowledge about shoes.
 - ☐ Going forward I want to add more feature to the page that interacts with the login page, like giving the client the abilty to save shoes that their interest in for the future visit.
 - ☐ I would like to add more interactions with the users like fun puzzles that tell the user about shoes.
